Q1 Matrix multiplication

10 marks

Matrix multiplication

Your Code

```
1 import java.util.Scanner;
2
3 public class Main {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         int r1 = sc.nextInt();
8         int c1 = sc.nextInt();
9
10        int[][] matrix1 = new int[r1][c1];
11        for (int i = 0; i < r1; i++) {
12            for (int j = 0; j < c1; j++) {
13                matrix1[i][j] = sc.nextInt();
14            }
15        }
16
17        int r2 = sc.nextInt();
18        int c2 = sc.nextInt();
19
20        int[][] matrix2 = new int[r2][c2];
21        for (int i = 0; i < r2; i++) {
22            for (int j = 0; j < c2; j++) {
23                matrix2[i][j] = sc.nextInt();
24            }
25        }
26
27        if (c1 != r2) {
28            System.out.println("Matrix multiplication not possible");
29            return;
30        }
31
32        int[][] result = new int[r1][c2];
33        for (int i = 0; i < r1; i++) {
34            for (int j = 0; j < c2; j++) {
35                result[i][j] = 0;
36                for (int k = 0; k < c1; k++) {
37                    result[i][j] += matrix1[i][k] * matrix2[k][j];
38                }
39            }
40        }
41
42        for (int i = 0; i < r1; i++) {
43            for (int j = 0; j < c2; j++) {
44                System.out.print(result[i][j] + " ");
45            }
46            System.out.println();
47        }
48
49        sc.close();
50    }
51 }
