Q1 Student

10 marks

Write a program to enter the mark of a student in four subjects. Then calculate the total and aggregate. Display the grade obtained by the student, if student scores an aggregate greater than 75% then grade is distinction

Your Code

```
1 import java.util.Scanner;  
2 public class Main {  
3     public static void main(String[] args) {  
4         Scanner scanner = new Scanner(System.in);  
5         double m1 = scanner.nextDouble();  
6         double m2 = scanner.nextDouble();  
7         double m3 = scanner.nextDouble();  
8         double m4 = scanner.nextDouble();  
9         double total = m1 + m2 + m3 + m4;  
10        double aggregate = total / 4.0;  
11        System.out.println("Total: " + total);  
12        System.out.println("Aggregate: " + aggregate);  
13        if (aggregate > 75) {  
14            System.out.println("Grade: Distinction");  
15        } else if (aggregate >= 60) {  
16            System.out.println("Grade: First Class");  
17        } else if (aggregate >= 50) {  
18            System.out.println("Grade: Second Class");  
19        } else if (aggregate >= 40) {  
20            System.out.println("Grade: Third Class");  
21        } else {  
22            System.out.println("Grade: Fail");  
23        }  
24        scanner.close();  
25    }  
26 }
```

write a program to print the total amount available in the atm machine with the conditions applied total denominations are 2000, 500, 200,100, get the denomination priority from the user and the total number of notes from the user to display the total available balance to the user

Your Code

```
1 import java.util.Scanner;  
2 public class Main {  
3     public static void main(String[] args) {  
4         Scanner scanner = new Scanner(System.in);  
5         int totalBalance = 0;  
6         for (int i = 0; i < 4; i++) {  
7             int denomination = scanner.nextInt();  
8             int notesCount = scanner.nextInt();  
9             totalBalance += denomination * notesCount;  
10        }  
11  
12        System.out.println("Total Available Balance: " + totalBalance);  
13        scanner.close();  
14    }  
15 }

Q3 TAX

10 marks

Write a program to calculate tax given following condition :

If income is less than or equal to 150000 then to tax

If taxable income is 150001 – 300000 the charge 10% tax

If taxable income is 300001 – 500000 the charge 20% tax

If taxable income is above 500001 the charge 30% tax

Your Code

```
1 import java.util.Scanner;
2 public class Main {
3     public static void main(String[] args) {
4         Scanner scanner = new Scanner(System.in);
5         double income = scanner.nextDouble();
6         double tax = 0;
7         if (income <= 150000) {
8             tax = 0;
9         } else if (income <= 300000) {
10             tax = (income - 150000) * 0.10;
11         } else if (income <= 500000) {
12             tax = (150000 * 0.10) + (income - 300000) * 0.20;
13         } else {
14             tax = (150000 * 0.10) + (200000 * 0.20) + (income - 500000) * 0.30;
15         }
16         System.out.println("Tax: " + tax);
17         scanner.close();
18     }
19 }

Q4 BONUS

10 marks

a bonus 5% salary is given to grade A workers and 10% bonus to Grade B , write a program to enter salary and grade of employee , if salary less than employee gets an extra 2% binus on salary. Calculate the bonus that has to be given to the employee and print the salary that the employee will get

Your Code

```
1 import java.util.Scanner;
2 public class Main {
3     public static void main(String[] args) {
4         Scanner scanner = new Scanner(System.in);
5         char grade = scanner.next().toUpperCase().charAt(0);
6         double salary = scanner.nextDouble();
7         double bonusPercentage = 0.0;
8         if (grade == 'A') {
9             bonusPercentage = 0.05;
10        } else if (grade == 'B') {
11            bonusPercentage = 0.10;
12        }
13        if (salary < 10000) {
14            bonusPercentage += 0.02;
15        }
16        double bonus = salary * bonusPercentage;
17        double totalSalary = salary + bonus;
18        System.out.println("Bonus = " + bonus);
19        System.out.println("Total Salary = " + totalSalary);
20        scanner.close();
