```
public class Debug4 {
    public static void main(String[] args) {
        String name = null;
        System.out.println(name.length());
    }
}
```

Expected Task
Prevent the program from crashing.

🌟 Debugging Task: Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```
1 import java.util.Scanner;
2
3 public class Debug4 {
4     public static void main(String[] args) {
5
6         Scanner sc = new Scanner(System.in);
7
8         String name = sc.nextLine();
9
10        if (name.equals("null")) {
11            name = null;
12        }
13
14        if (name == null) {
15            System.out.println("String is null");
16        } else {
17            System.out.println(name.length());
18        }
19    }
20 }
```

2/2 answered

```
public class Debug1 {
    public static void main(String args[]) {
        Scanner sc = new Scanner(System.in);
        int arr[] = {20,40,60,80};
        int index = sc.nextInt();
        int divisor = sc.nextInt();
        try {
            int value = arr[index];
        }
        try {
            int result = value/divisor;
            System.out.println(result);
        }
        catch(ArrayIndexOutOfBoundsException e) {
            System.out.println("Invalid Index");
        }
        }
        catch(ArithmeticException e) {
            System.out.println("Division by Zero");
        }
        }
    }
}
```

Debugging Task

Identify why some exceptions are never caught.

Modify the exception handling so all runtime exceptions are handled correctly.

Debugging Task: Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```
1 import java.util.Scanner;
2
3 public class Debug1 {
4     public static void main(String args[]) {
5
6         Scanner sc = new Scanner(System.in);
7
8         int arr[] = {20, 40, 60, 80};
9
10        int index = sc.nextInt();
11        int divisor = sc.nextInt();
12
13        try {
14            int value = arr[index];
15
16            try {
17                int result = value / divisor;
18                System.out.println(result);
19            }
20            catch (ArithmeticException e) {
21                System.out.println("Division by Zero");
22            }
23        }
24        catch (ArrayIndexOutOfBoundsException e) {
25            System.out.println("Invalid Index");
26        }
27    }
28 }
```

Test Input

1 0

Output

Division by Zero
